

Yassine TAGHDA

Student in an engineering program, Data / Artificial Intelligence.

- Looking for an internship
- Availability: starting May 10, 2027 / Duration: 12 weeks

CONTACT

Phone : 07 83 79 02 39

Email : yassine.taghda01@gmail.com

Villeneuve d'Ascq, France

SOFTWARE

- Programming, descriptive statistical analysis, data cleaning | Python, C, C++ (Google Colab, Notebooks...)
- Python Modules for Machine Learning and Data Analysis (sklearn, pandas, numpy, matplotlib...)
- Datavisualisation | Power BI, Qlickview
- Mathematical Calculations | R, SAS, MATLAB
- Automation, forms | VBA, Access
- DBMS | Oracle, MySQL
- Web | HTML, CSS
- Pack-Office | Word, Excel, Powerpoint

LANGUAGES

- French : Native language
- English : B2 (TOEIC)
- Spanish : A2
- Ancient Greek : A1

QUALITIES

- Persistent/curious
- Analytical mindset
- Self-sufficient
- Rigorous

AREAS OF INTEREST

- Game developer
- Graphic design: thumbnails, logo design, banners
- Musician (Computer-Assisted Music)
- Sports: Running, tennis, swimming, football
- Participation in charitable activities: Restos du cœur, Course contre la faim

EDUCATION

Engineering program. Master 1 Data/IA. ISEN Junia Lille | 2026-27

Skills acquired:

- Computer Science: C, C++, Advanced Python Scripting, Machine Learning (Linear Regression, KNN, Decision Tree...) Databases (MCD, MLD), SQL Queries, R Language, Data Analysis
- Signal Processing: Laplace and Fourier transforms, amplitudes and frequencies, programming with MATLAB...
- Quantum Mechanics: Schrödinger's equation, particle position probability density, uncertainty principle, background in quantum computing
- Digital Electronics: Basics of assembly language programming

Bachelor Data Science. IUT Lille | 2022-25

Skills acquired:

- Development of decision-making tools, data modeling
- Data processing for statistical and decision-making purposes
- Spreadsheets, reporting, and communication with users
- Programming, databases, Python programs for statistical analysis, generating graphs and visualization tools, SQL queries, reports
- Descriptive statistics: Data organization, formulas, graphs/curves, frequency tables
- Probability (Poisson, normal, and Student's distributions)

Baccalauréat Mathématiques/Informatique/Anglais (mention Bien)

Lycée R. Queneau. Villeneuve d'Ascq | 2022

PROJECTS AND EXPERIENCES

Carrera – Logistics Department. Casablanca (Morocco) | 2026

- Development of an application for automatically printing labels for the export of furniture and woodworking products (Tkinter and FPDF Python modules)

France Travail – Steering Department. Lille (59) | 2024-25

An 8-month work-study program from November 2024 to July 2025 focusing on the processing of job seekers' data and their new places of employment:

- Calculation of the distance in kilometers between home and workplace using the Haversine formula, based on GPS coordinates obtained through a government API.
- Processing of confidential data
- Development of an application to handle missing values for the neighborhoods where job seekers are from—automating the process.
- Descriptive statistics and correlation studies (regression models, variable importance, etc.)

Enedis - Ville de Villeneuve d'Ascq (59) | 2024

A 10-week internship from April 8 to June 15, 2024, with a mission that involves optimizing and reducing energy consumption in the city's buildings:

- Analysis of energy consumption data, reporting, statistical analysis, and management of data formats and missing data using Python
- Study of energy-intensive buildings in accordance with the Tertiary Sector Decree (French legislation)

Electricité de France (EDF). Gravelines (59) | 2019

Nuclear Power Plant. 9th-Grade Internship.

- General functioning of a nuclear power plant
- Training in safety and day-to-day site operations
